The NewTec complete package for secure wireless transmission

## Secure Wireless Technologies

Safe & Secure Wireless Transmission

The comprehensive network integration of facilities and systems is a fundamental requirement in these time of Industry 4.0 and IoT – from wireless transmission of sensor data, to wireless system communication (M2M), and through to the controlling of complex systems. It is important in this case that the data are transmitted in a fast and reliable fashion and that the communication is secure and protected.

NewTec offers a comprehensive complete system of services, products and training offers for everything to do with wireless technologies, Bluetooth® wireless technology and Bluetooth® low energy technology. As an expert for secure wireless solutions, we support you during the development of tailor-made products that meet all the network-integration requirements of your particular market. As the reliable partner at your side, we provide you with the advice and assistance when selecting the corresponding technologies you need for the implementation. Benefit from our expertise for secure, encrypted and authorised communication and our experience in the development of interoperable systems with smartphones, tablets and smartwatches.

### The benefits for you:

**Risks associated with development are minimised** thanks to the selection of the appropriate technologies

**Reduced development costs** thanks to the comprehensive wireless expertise that NewTec can offer

**Shortened time-to-market** thanks to our accompanying assistance and advice during global-licensing process

Creating safety.  
With passion.
