Top-of-the-World Agile Solutions

Today's business world is dynamic: volatile, uncertain, ambiguous, and complex. For superior business outcomes, businesses need a paradigm shift in the way their organisations work.

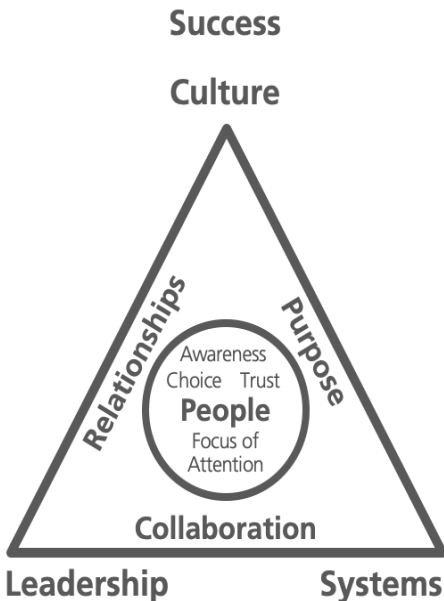

AGILITYINSIGHTS helps you and your team reach agile maturity for step changes in performance, innovation, and growth. Certified Agile Mentors work with our toolbox to provide leading solutions for you to make the shift to agile. Our systemic approach combines the Dynamic Leadership Model and visual design thinking with the integrated Agile Diagnostic.

Results

- Shared understanding and agenda
- Diagnostic data for agile design
- Identified issues and action plan
- Trained agile experts as supervisors

Outcomes

- Ability to compete in dynamic contexts
- Higher speed, agility, and resilience
- Superior performance, innovation and growth

With our books, *The Performance Triangle* and *Management Design*, we were one of the first agile practitioners to propose that business operations in a dynamic context require agile capabilities. As such, we developed Agile Diagnostics, the most rigorously researched and widely used agile assessment, which helps organisations measure, design, and develop agile capabilities. Agile results are displayed as visual design thinking aids in combination with the Performance Triangle Leadership Model and provides a common framework and language for scaling agile across all organisational levels.

How agile is your organisation? What can you do?

Three solutions offer the answers:

AGILE SHIFT for organisations

«Crossing the agile Rubicon»

AGILE SHIFT helps your organisation to make the shift to agile by exploring your current agile capabilities, creating a roadmap that works for you and providing development guidance to remove interferences and ensure you reach top agile maturity levels.

AGILE FITNESS for teams

«Get ready for the shift»

AGILE FITNESS helps your team to get ready for new challenges by measuring your organisation's agile maturity for clarity on the baseline, by supporting your decision on the desired maturity target, and by creating a roadmap to exploit the potential.

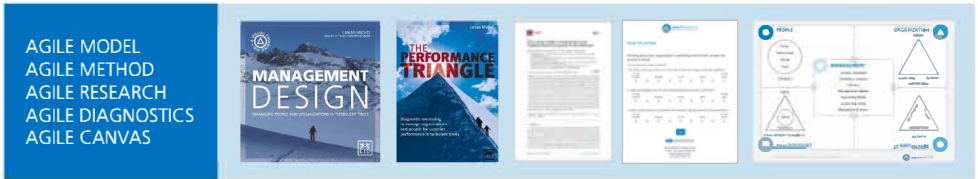

AGILE INSIGHTS for executives

«Identify what it takes»

AGILE INSIGHTS helps you rise to higher challenges by identifying what it takes to make the shift to agile, and to reach utmost clarity on your organisation's agile maturity and potential by identifying issues and closing the gaps.

The Agile Toolbox

Our toolbox combines a Dynamic Leadership Model, visual design thinking, and the integrated Agile Diagnostic to offer a Systems Approach to agility. We believe in agile capabilities that permeate an entire organisation from top management out to the client periphery. We know that scaling agility from the bottom up does not work. This is why we promote a systemic approach that initiates with management.

The Global Agile Hub

We are a global network of certified executive mentors and in-house agile professionals. We use AGILITYINSIGHTS' solutions and our approach is to share our goal to achieve our mission of Changing the world through better management. The Global Agile Hub is the place to share, learn, collaborate, and get inspired.

Certified Agile Mentors

Our executive mentors are recognized top-of-the-world experts with extensive experience in the process of building agile capabilities. They engage in research, provide thought leadership, and can work directly with you, your team, and your organisation to help you realise step changes in outcomes.
